

Pricise

Shop safe? Honest deal? Best safe price?

A Chrome extension whose agents check every product page before you buy, challenge each other’s findings, and show the proof.

Open Agent Hackathon 2026 · Track 3: Reasoning Architecture · Team XLR8: Shriganesh, Raj, Abel, Josh, Emmanuel

WHY IT MATTERS

Online shopping is expensive

SCAMS

$15.9B

lost to fraud reported to the FTC in 2025. Online shopping is the 2nd most reported fraud type.

Source: FTC, Mar 2025 and Mar 2026

FAKE DISCOUNTS

52%

of US consumers say brands regularly advertise fake discounts.

Source: YouGov, Feb 2024

HIDDEN FEES

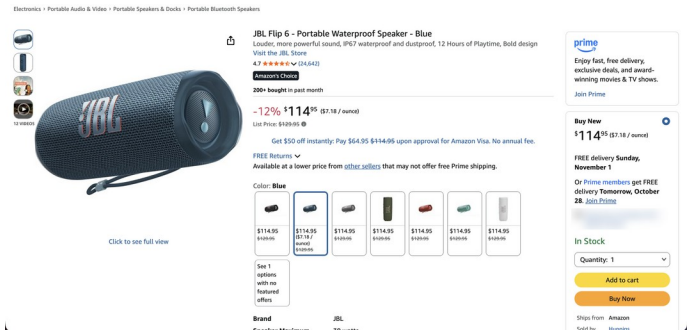

$11B

the FTC expects shoppers to save over 10 years once hidden fees on tickets and stays are banned.

Source: FTC junk fees rule, Dec 2024

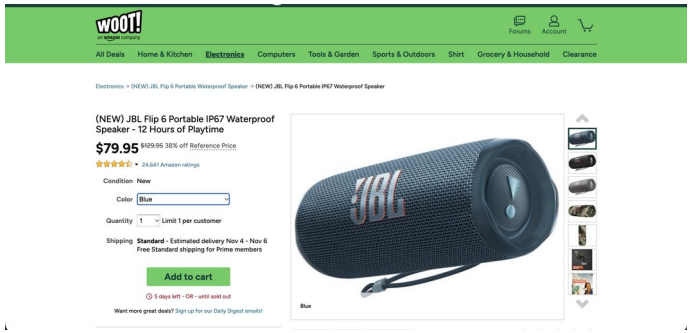

Every one of these is decided on a single product page, in seconds, before you click Buy.

One speaker, three prices, two traps

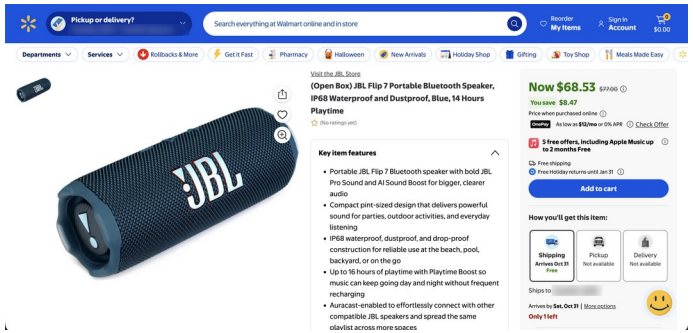

Amazon · $114.95

“12% off” a $129.95 list price, from a third-party seller

Woot · $79.95

$35 cheaper and new, but only a 90-day Woot warranty

Walmart · $68.53

Looks cheapest, but it’s an open-box Flip 7, not this item

Everyday online shoppers can’t check store safety, real discounts and look-alike offers on every page, so they overpay or buy the wrong thing.

Real listings, captured 27 October 2026 · personal details removed

THE SOLUTION

Pricise checks the page you're already on

1 **Shop safe?**

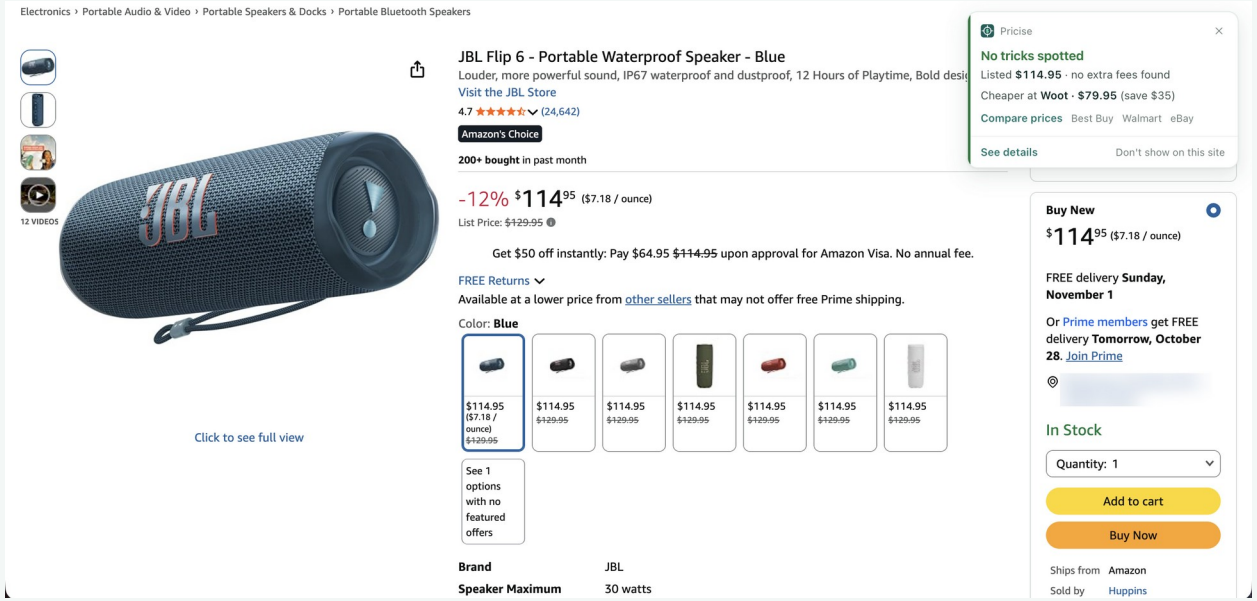

Trust Agent: HTTPS, domain age, returns and contact links, the real seller

2 **Honest deal?**

Deal Agent: discount claims against launch prices and price history

3 **Best safe price?**

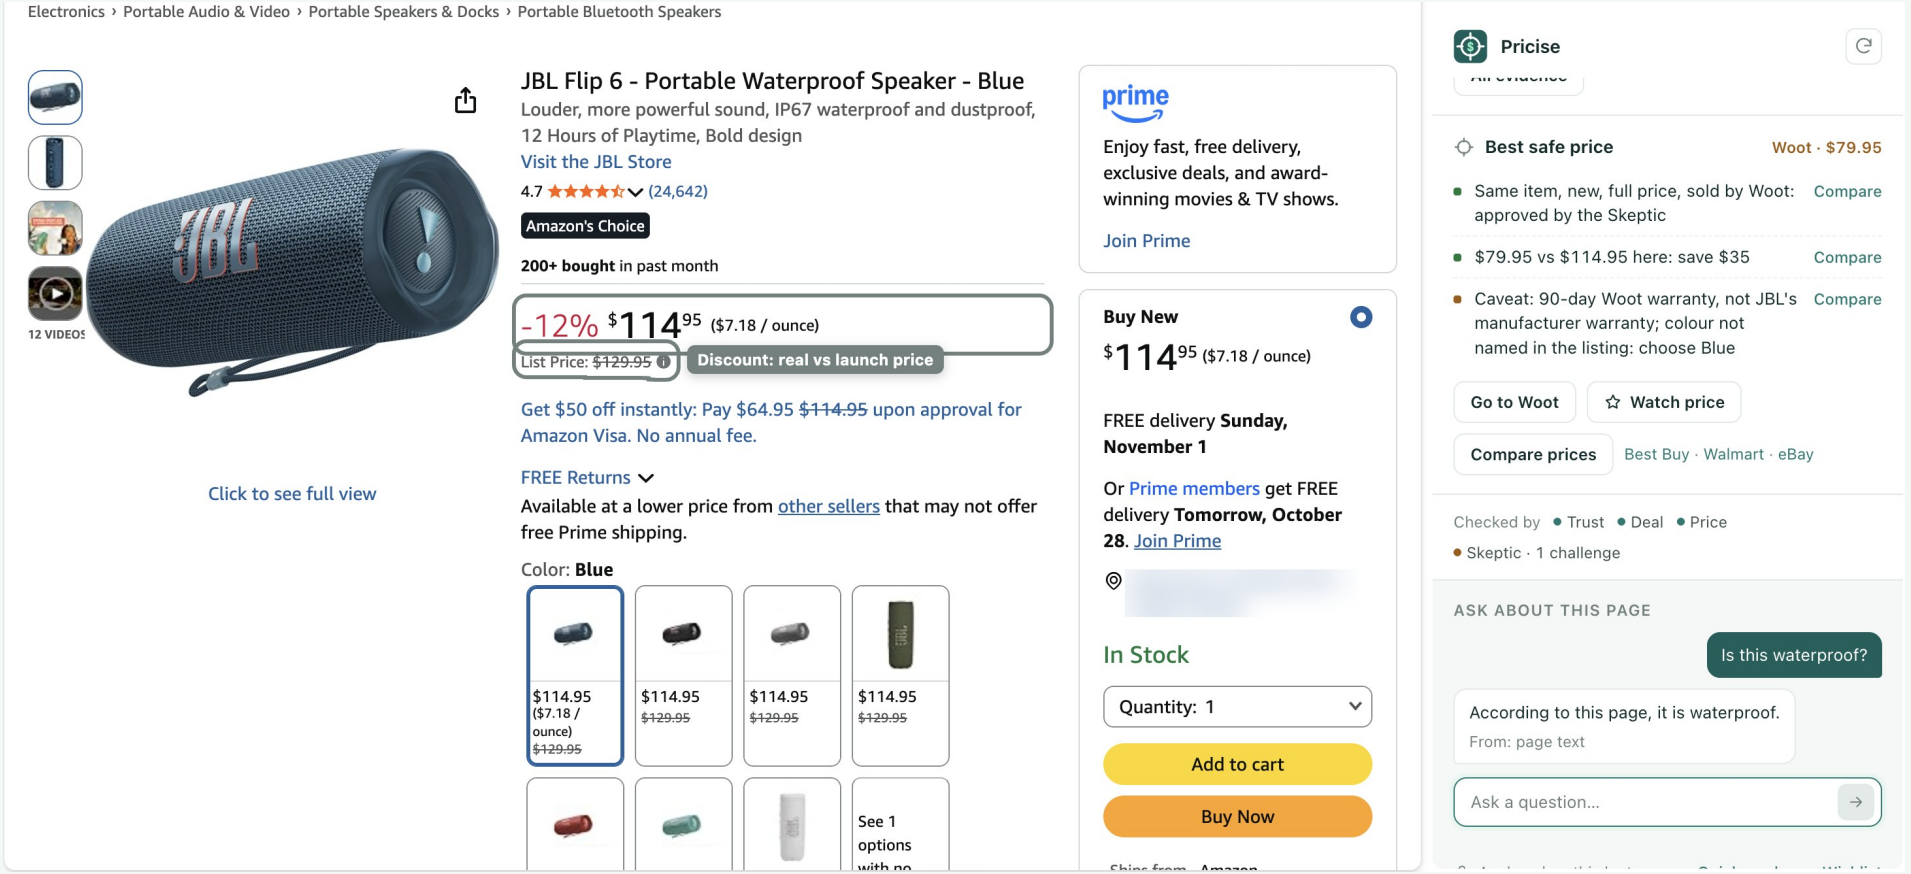

Price Agent: the same item, new, from credible stores only

The quick card on a real Amazon page: "No tricks spotted · Cheaper at Woot · $79.95 (save $35)"

Read-only on real stores. Every claim links to its proof.

The verdict, the proof and the better offer

Grey outline

"Discount: real vs launch price", not a trick

Best safe price

Woot $79.95, approved by the Skeptic

Chat

Answers from the page: "it is waterproof"

The agents check each other’s work

Trust Agent Is the store safe?

Checks HTTPS, domain age, return policy and who really sells it.

Found: Secure · domain 32 years old · third-party seller

Deal Agent Is the discount real?

Compares the “was” price with the maker’s price and looks for fake urgency.

Found: 12% off is real: $129.95 is JBL’s list price

Price Agent Is it cheaper somewhere safe?

Reads offers through Zetaris and keeps only the same item, new, from a trusted store.

Found: Woot $79.95, new: $35 less

Skeptic Agent Is it too good to be true?

Double-checks unusually low offers with NVIDIA Nemotron Ultra before you see them.

Found: Woot approved, with a 90-day warranty warning

Agent trace 8 findings

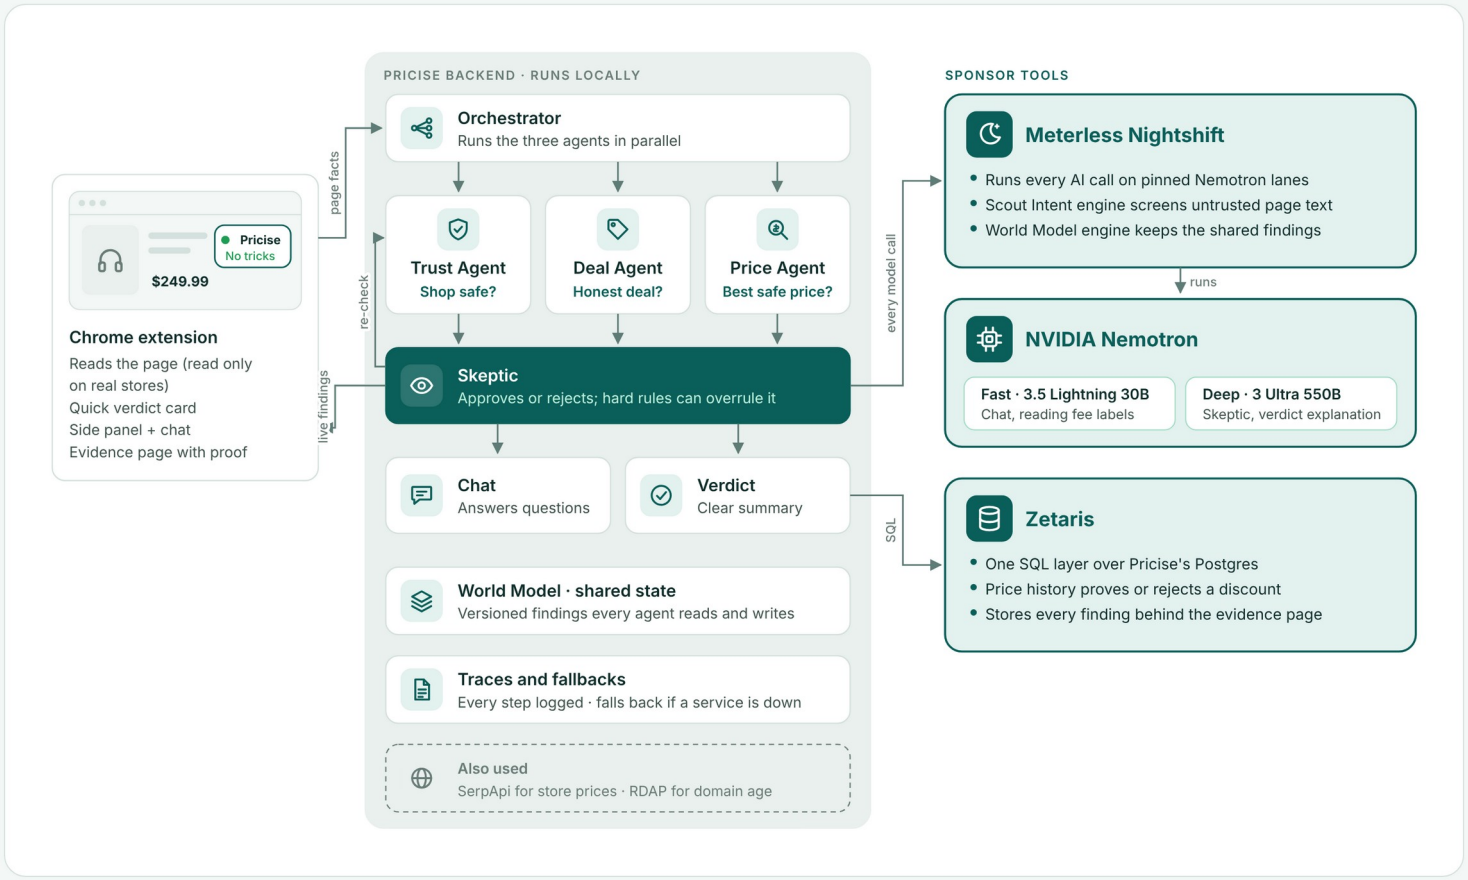

10:16:15 AM	page	confirmed	Read the page: JBL Flip 6 – Portable Waterproof Speaker – Blue, $114.95. Model: extension (no model call) · Source: this page
10:16:15 AM	trust	unverified	Sold by Huppins, shipped by Amazon: a third-party seller on Amazon, not Amazon itself; Pricise didn't check the seller. Model: rules (no model) · Source: this page
10:16:15 AM	trust	unverified	Company record and reviews for www.amazon.com aren't checked (no data source for real stores yet). Model: rules (no model) · Source: rules
10:16:22 AM	deal	confirmed	The $129.95 list price matches JBL's launch price (MSRP), so the discount is real against MSRP; credible stores charge from $79.95 to $134.95. Credible stores: Woot $79.95 lower, Walmart $114.95 same, JBL $134.95 higher (prices from Google Shopping (Zetaris snapshot), fetched 3:36 AM today; Google Shopping (Pricise cache), fetched 4:43 AM today). Model: rules (no model) · Source: Google Shopping (SerpApi)
10:16:22 AM	price	confirmed	Rejected 72 offers by rule: 29 not from a credible store, 28 used or refurbished, 13 marketplace sellers, 2 a different item. Model: rules (no model) · Source: Google Shopping (SerpApi)
10:16:22 AM	price	proposed	Woot $79.95: new, unusually low price, cheaper than here (save $35). Proposed for the Skeptic to check. Model: rules (no model) · Source: Zetaris pricise_usl.safe_price
10:16:22 AM	price	challenged by skeptic	Woot $79.95: new, unusually low price, cheaper than here (save $35). Proposed for the Skeptic to check. Model: rules (no model) · Source: Zetaris pricise_usl.safe_price
10:16:22 AM	price	confirmed, challenged by skeptic	Skeptic approved Woot $79.95, $35 less than here, unusually low and reviewed: Woot is a well-established retailer (domain registered 26 years ago) with secure HTTPS connection; Price of $79.95 is consistent across the offer and credible store prices data; Item is listed as new condition (decided by nvidia/nemotron-3-ultra-550b-a55b). Caveat: 90-day Woot warranty, not JBL's manufacturer warranty (Woot's usual terms, check the listing); colour not named in the listing: choose Blue. Model: nvidia/nemotron-3-ultra-550b-a55b · Source: Zetaris pricise_usl.safe_price

Real trace: every decision is logged with the model that made it.

Hard rules the AI can’t override

Threw out 72 offers: used, open box, unknown sellers or another colour.

How Pricise fits together

Browser

Extension reads the page, read-only

Backend

Orchestrator, 3 agents and the Skeptic, on the laptop

Sponsors

Nightshift runs every model call; Zetaris is the data layer

TECHNICAL STACK

Built to run on a laptop, reproducibly

Layer	Technology	Job
Browser	Chrome MV3 extension	Reads the page, quick card, side panel
Backend	Python FastAPI on localhost	Orchestrator, 4 agents, live findings
AI runtime	Meterless Nightshift	Every model call; Scout Intent and World Model engines
Models	Nemotron 3.5 Lightning 30B, 3 Ultra 550B	Chat and fee labels; the Skeptic
Data	Zetaris USL over Postgres + REST	safe_price table, data-quality rule
Prices	SerpApi Google Shopping, RDAP	Credible offers, domain age
Built with	Cursor, Claude Code in VS Code	705 offline tests, sample mode for judges

ZETARIS

One safe-price layer over three sources

3

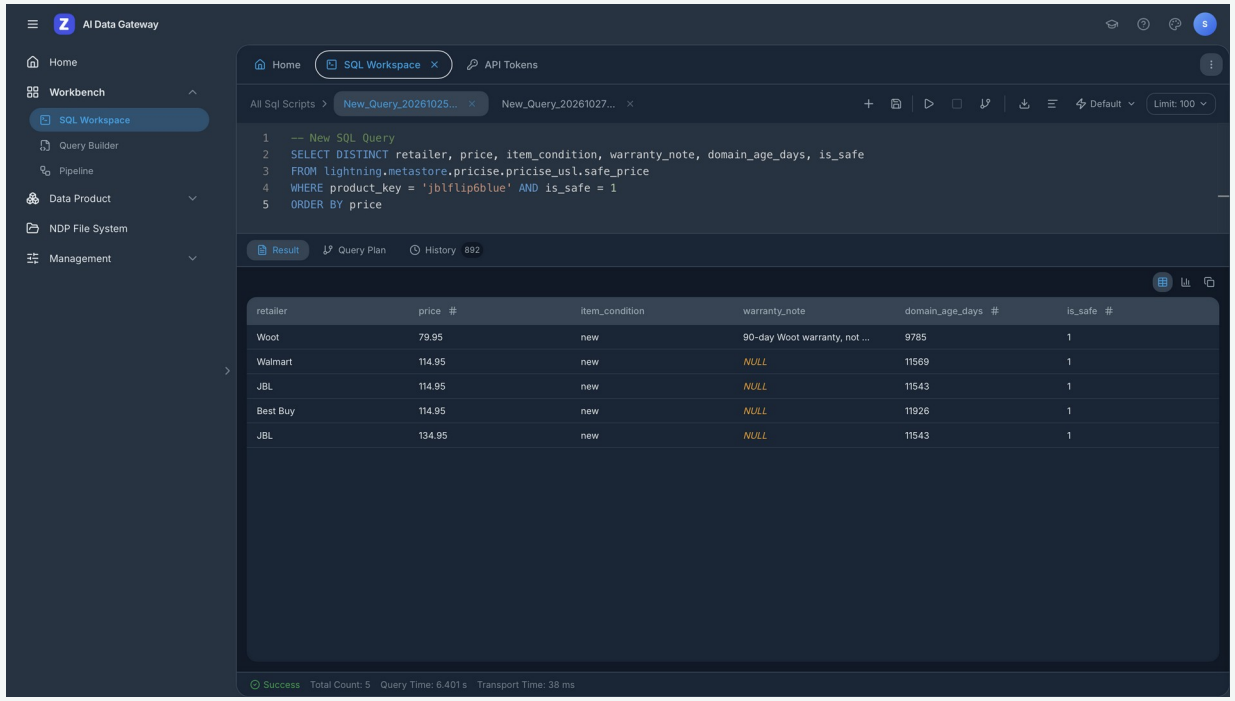

sources joined: Postgres, RDAP, Google Shopping

218 → 91

lines: hand-written Python replaced by SQL

79

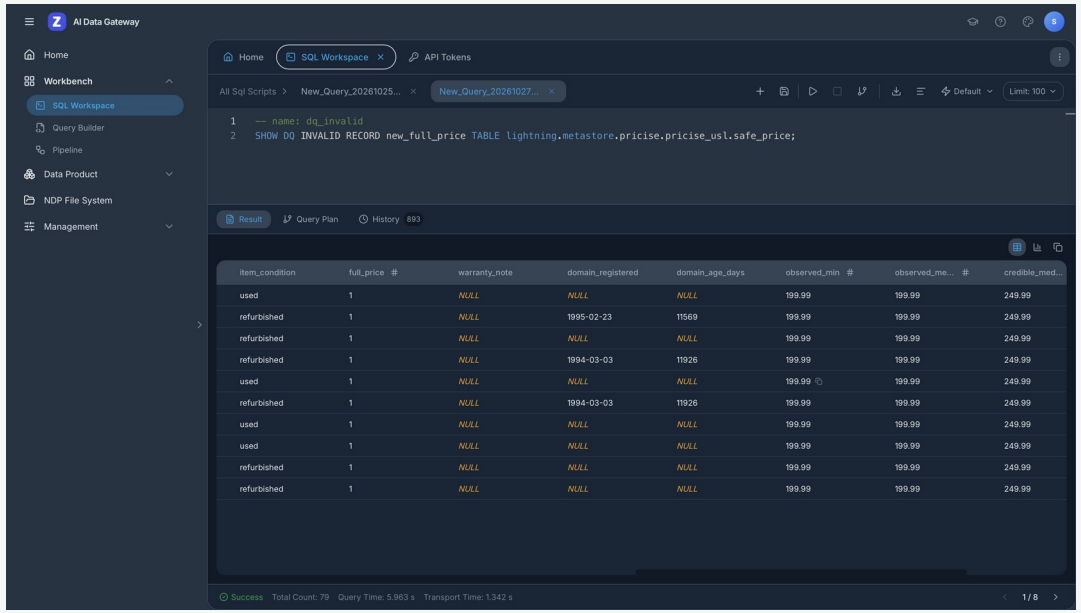

offers flagged by the data-quality rule

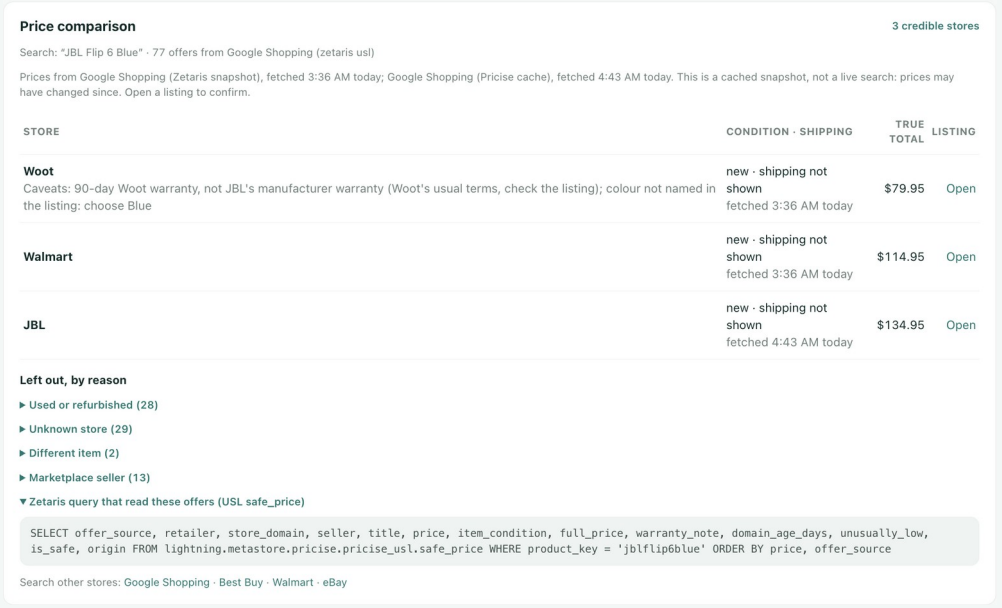

Live in Zetaris: the USL table safe_price returns each new, safe offer with its warranty note and domain age. The Price Agent reads offers through this table.

ZETARIS

Data quality and proof the agent used it

Data-quality rule new_full_price lists 79 offers that aren't new at a full price: used and refurbished listings.

The evidence page shows the exact USL query behind every price comparison, and when the prices were fetched.

Every AI call runs through Nightshift

Scout Intent engine

Screens untrusted page text before every Nemotron call

World Model engine

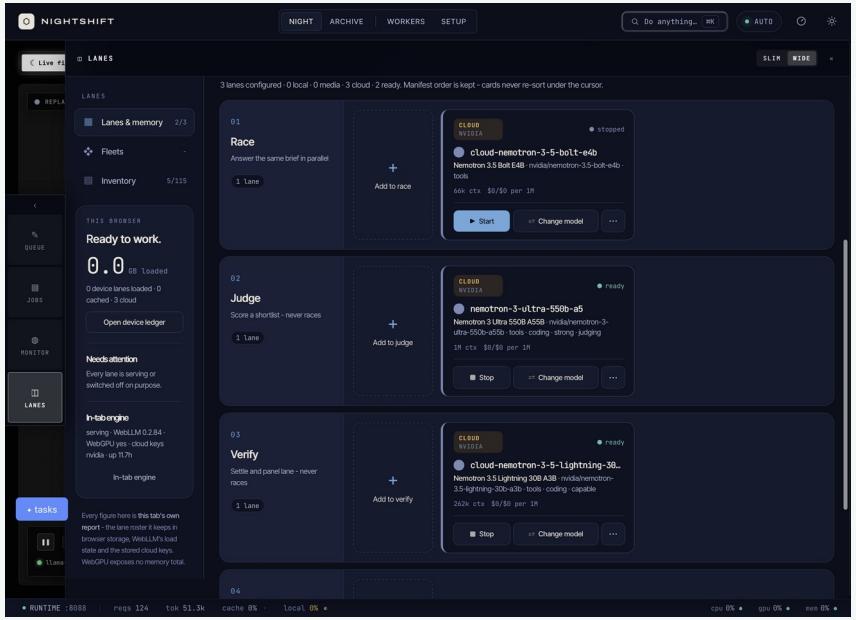

Shared, versioned store of findings for all agents

Nemotron 3 Ultra 550B

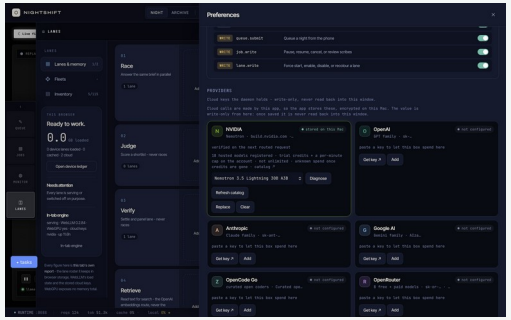

The Skeptic: decides borderline offers

Nemotron 3.5 Lightning 30B

Chat from page text, fee labels

Nightshift lanes: Ultra on Judge, Lightning on Verify, both ready

NVIDIA key lives in Nightshift, not in our code

The engines are tested, not just installed

```

99 passed

Scout Intent, World Model and orchestrator tests, run offline

705 tests in the full suite pass; sample mode lets judges run Pricise from a clean clone

WHAT'S UNIQUE

The model decides. Rules keep it honest.

A second opinion on every deal

Before you see a deal, our Skeptic agent checks it with NVIDIA Nemotron Ultra, and hard rules make sure it can't be fooled.

Cheapest and safe, in one answer

Zetaris combines live prices, price history and store age, so a lower price never comes from a risky store.

Stores can't trick the AI

Store pages are treated as untrusted. Hidden instructions are removed before any AI reads them.

And it never clicks, adds to cart or buys. You stay in control.

FUTURE ENHANCEMENTS

What we’d build next

Seller checks

Rate third-party sellers, not just the store

Longer price history

Prove fake discounts on real stores

Faster USL

Materialise safe_price for instant reads

More products

Launch prices and matching beyond our starter list

Price-drop alerts

Watch a wishlist item across safe stores

Chrome Web Store

Ship it, still analysed on your laptop

Thank you for this experience

Before you buy, be Pricise.
