

Pricise

Shop safe? Honest deal? Best safe price?

A Chrome extension whose agents check every product page before you buy, challenge each other’s findings, and show the proof.

Open Agent Hackathon 2026 · Track 3: Reasoning Architecture · Team XLR8: Shriganesh, Raj, Abel, Josh, Emmanuel

WHY IT MATTERS

Online shopping is expensive

SCAMS

$15.9B

lost to fraud reported to the FTC in 2025. Online shopping is the 2nd most reported fraud type.

Source: FTC, Mar 2025 and Mar 2026

FAKE DISCOUNTS

52%

of US consumers say brands regularly advertise fake discounts.

Source: YouGov, Feb 2024

HIDDEN FEES

$11B

the FTC expects shoppers to save over 10 years once hidden fees on tickets and stays are banned.

Source: FTC junk fees rule, Dec 2024

Every one of these is decided on a single product page, in seconds, before you click Buy.

The agents check each other’s work

Trust Agent Is the store safe?

Checks HTTPS, domain age, return policy and who really sells it.

Found: Secure · domain 32 years old · third-party seller

Deal Agent Is the discount real?

Compares the “was” price with the maker’s price and looks for fake urgency.

Found: 12% off is real: $129.95 is JBL’s list price

Price Agent Is it cheaper somewhere safe?

Reads offers through Zetaris and keeps only the same item, new, from a trusted store.

Found: Woot $79.95, new: $35 less

Skeptic Agent Is it too good to be true?

Double-checks unusually low offers with NVIDIA Nemotron Ultra before you see them.

Found: Woot approved, with a 90-day warranty warning

Agent trace 8 findings

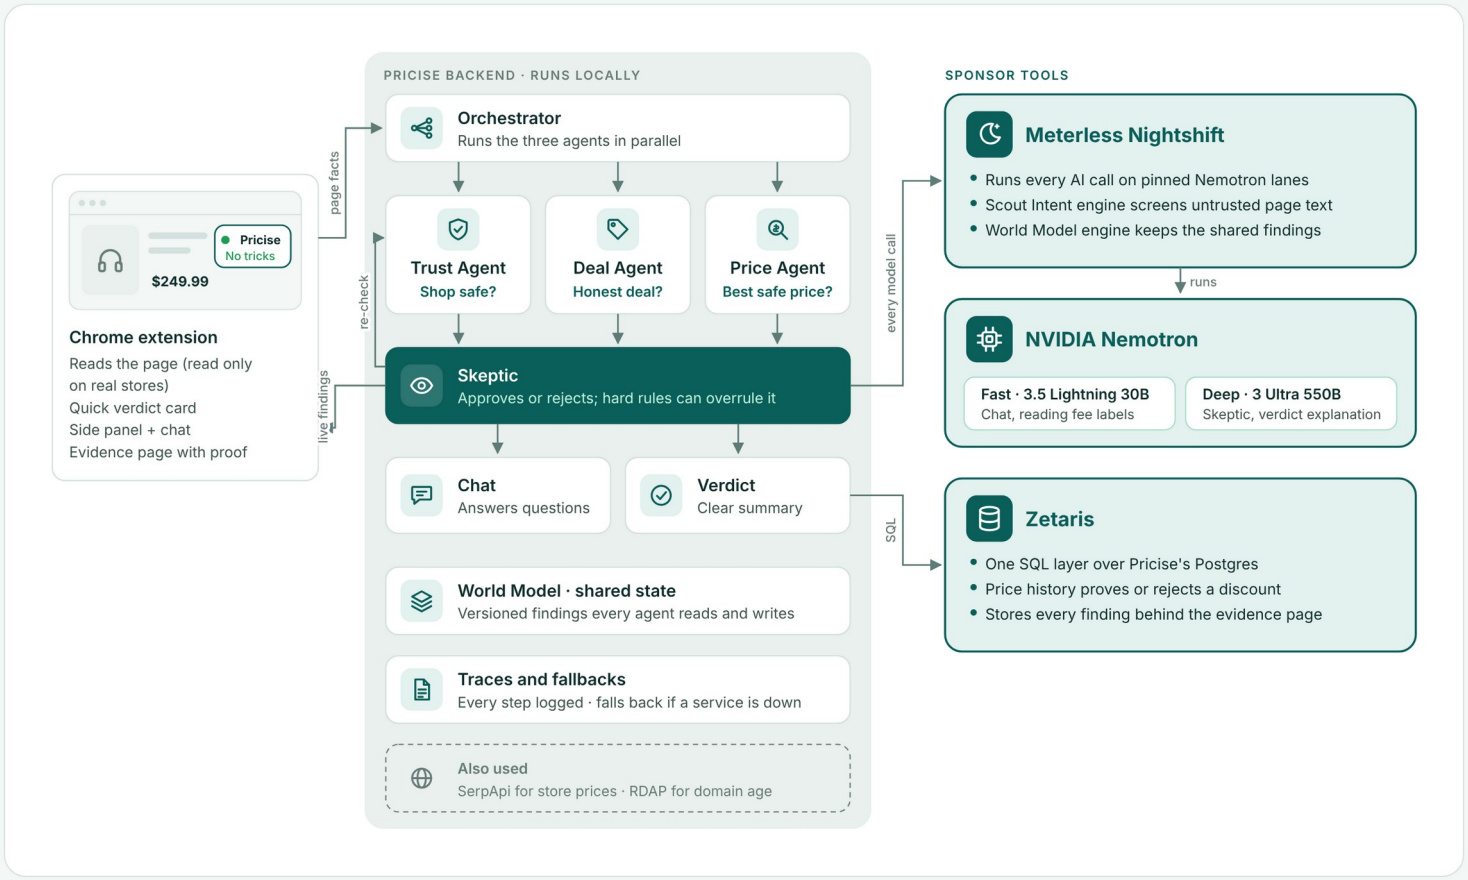

10:16:15 AM	page	confirmed	Read the page: JBL Flip 6 – Portable Waterproof Speaker – Blue, $114.95. Model: extension (no model call) · Source: this page
10:16:15 AM	trust	unverified	Sold by Huppins, shipped by Amazon: a third-party seller on Amazon, not Amazon itself; Pricise didn't check the seller. Model: rules (no model) · Source: this page
10:16:15 AM	trust	unverified	Company record and reviews for www.amazon.com aren't checked (no data source for real stores yet). Model: rules (no model) · Source: rules
10:16:22 AM	deal	confirmed	The $129.95 list price matches JBL's launch price (MSRP), so the discount is real against MSRP; credible stores charge from $79.95 to $134.95. Credible stores: Woot $79.95 lower, Walmart $114.95 same, JBL $134.95 higher (prices from Google Shopping (Zetaris snapshot), fetched 3:36 AM today; Google Shopping (Pricise cache), fetched 4:43 AM today). Model: rules (no model) · Source: Google Shopping (SerpApi)
10:16:22 AM	price	confirmed	Rejected 72 offers by rule: 29 not from a credible store, 28 used or refurbished, 13 marketplace sellers, 2 a different item. Model: rules (no model) · Source: Google Shopping (SerpApi)
10:16:22 AM	price	proposed	Woot $79.95: new, unusually low price, cheaper than here (save $35). Proposed for the Skeptic to check. Model: rules (no model) · Source: Zetaris pricise_usl.safe_price
10:16:22 AM	price	challenged by skeptic	Woot $79.95: new, unusually low price, cheaper than here (save $35). Proposed for the Skeptic to check. Model: rules (no model) · Source: Zetaris pricise_usl.safe_price
10:16:22 AM	price	confirmed, challenged by skeptic	Skeptic approved Woot $79.95, $35 less than here, unusually low and reviewed: Woot is a well-established retailer (domain registered 26 years ago) with secure HTTPS connection; Price of $79.95 is consistent across the offer and credible store prices data; Item is listed as new condition (decided by nvidia/nemotron-3-ultra-550b-a55b). Caveat: 90-day Woot warranty, not JBL's manufacturer warranty (Woot's usual terms, check the listing); colour not named in the listing: choose Blue. Model: nvidia/nemotron-3-ultra-550b-a55b · Source: Zetaris pricise_usl.safe_price

Real trace: every decision is logged with the model that made it.

Hard rules the AI can’t override

Threw out 72 offers: used, open box, unknown sellers or another colour.

How Pricise fits together

Browser

Extension reads the page, read-only

Backend

Orchestrator, 3 agents and the Skeptic, on the laptop

Sponsors

Nightshift runs every model call; Zetaris is the data layer

WHAT'S UNIQUE

The model decides. Rules keep it honest.

A second opinion on every deal

Before you see a deal, our Skeptic agent checks it with NVIDIA Nemotron Ultra, and hard rules make sure it can't be fooled.

Cheapest and safe, in one answer

Zetaris combines live prices, price history and store age, so a lower price never comes from a risky store.

Stores can't trick the AI

Store pages are treated as untrusted. Hidden instructions are removed before any AI reads them.

And it never clicks, adds to cart or buys. You stay in control.

Thank you for this experience

Before you buy, be Pricise.
